

WHAT IS TOKENIZE XCHANGE

Tokenize Xchange is a next generation digital currency exchange that supports both established and emerging digital currencies; as well as being a fiat gateway to purchase digital currencies. Other than providing various functions for users to grow their portfolio, safely and securely, we are also venturing into cryptocurrencies spending as well.

What is TKX?

TKX TOKENOMICS

Tokenize Emblem, TKX is an ERC20 token based on the Ethereum blockchain. The primary use of TKX is to enhance user's trading experience as well as having access to exclusive events and functions of Tokenize Xchange platform. Upcoming pipeline includes Xclusive App with TKX as a form of transaction means for goods & services.
